Andrew Gomes

Frontend Developer | React | Next.js | Node.js | JavaScript |
TypeScript | HTML | TailwindCSS
Nova Iguaçu, Rio de Janeiro, Brazil

Summary

I'm a Frontend Developer with over 4 years of experience and a
strong fullstack and tech leadership background. I'm passionate
about building scalable, high-performance web applications that
deliver real value to users and businesses.

At OVERCUB, I led the development of a sales platform: improving
performance, reducing infrastructure costs, and mentoring a cross-
functional team.
At Ambizzion IT, I contributed to the development and maintenance
of several high-traffic websites, including the Carter's Brasil e-
commerce platform.

Tech stack:
Next.js · React.js · Node.js · JavaScript · TypeScript · HTML ·
TailwindCSS · PostgreSQL · REST APIs · CI/CD · Web Performance
· Vercel · AWS · OpenAI API · Prompt Engineering · SCSS · CSS ·
Git · Scrum

What I focus on:

Building scalable and maintainable web architectures

- Optimizing frontend performance and user experience
- Leading development teams and promoting engineering best
practices
- Translating complex business logic into clean, elegant code

Mentorship, code reviews, and continuous improvement

I thrive in remote, collaborative environments and am always
learning, with a mindset focused on delivering consistent results, and
solving real problems.

Let's connect if you're building something meaningful.

————

Experience

OVERCUB
10 months

Technical Lead
December 2024 - Present (8 months)
Brazil

I worked as Tech Lead at OVERCUB, leading the development of a sales platform designed to connect sellers and buyers in the gaming market.

Key responsibilities and achievements:

- Led a multidisciplinary development team, ensuring code quality, architectural consistency, and efficient delivery of new features.

- Designed and implemented a scalable architecture using Next.js, React, and Node.js, with a focus on performance and maintainability.

- Prioritized data efficiency and cost reduction, applying strategies to reduce bandwidth consumption, improve loading times, and optimize infrastructure usage.

- Developed backend APIs and services with a focus on modularity, security, and high performance.

- Collaborated with product, design, and business teams to transform complex financial workflows into simple and intuitive user experiences.

- Promoted best practices in software engineering, including code reviews, CI/CD, and automated testing.

Highlights:

- Achieved significant improvements in application performance and speed.
- Reduced data consumption through efficient rendering and backend optimizations.

- Acted as a technical mentor, fostering a culture of continuous learning and collaboration within the team.

Full Stack Developer
October 2024 - December 2024 (3 months)
Brazil

I worked as Fullstack at OVERCUB, a sales platform designed to connect sellers and buyers in the gaming market.

Responsibilities and achievements:

- Actively contributed to the development of the platform using Next.js, React, Node.js, and PostgreSQL, with a strong focus on performance, scalability, and user experience.

- Helped design a clean, efficient, and maintainable architecture on both the frontend and backend.

- Implemented solutions aimed at reducing data consumption and optimizing performance, directly contributing to lower operational costs and faster application speed.

- Designed and developed robust, secure, and modular APIs to support the platform's core features.

What I'm most proud of:

- Delivering features that had a direct impact on user experience and retention.
- Contributing to significant improvements in the platform's overall performance.
- Driving a development process focused on technical efficiency and cost reduction in infrastructure.

Ambizzion IT
Frontend Developer
June 2020 - Present (5 years 2 months)
Brazil

As a Frontend Developer at Ambizzion IT, I've been responsible for building, evolving, and maintaining modern websites and web platforms for high-profile clients. One of my main contributions was working on the Carter's Brazil

e-commerce website (www.carters.com.br), where I helped enhance UI, performance, and user experience.

Main responsibilities:

- Developing responsive and high-performance interfaces with a strong focus on usability and SEO.

- Creating reusable components using modern technologies like React.js, Next.js, and JavaScript/TypeScript.

- Maintaining and optimizing existing websites to ensure stability, accessibility, and cross-browser compatibility.

- Integrating with APIs and collaborating closely with backend, design, and product teams.

- Participating in deployment, testing, and quality assurance processes.

Education

Universidade Unigranrio

Bacharelado em Engenharia, Engenharia Civil · (July 2017 - December 2022)
